COMPACT SWITCHLINE 3D

The Compact Switchline range 3D is fully compatible with digital satellite and terrestrial signals. The products have been designed to be installed in small to medium sized installations.

PRODUCT ADVANTAGES

High number of outputs; small in size; active satellite band no through loss (0dB): to guarantee the quality of the satellite signals with long cable drops; the TV band 5+862MHz forward and return path are passive; terrestrial 12V power supply to feed pre amplifier on terrestrial input: wall fixings provided; versatile installation, products can be fitted sideways, horizontally and vertically. Packaging 1pc

SMART SWITCHLINE XS4, XS5 and XS9

Smart Switchline XS is a new range of multi switches developed for small and medium sized cascadable systems. They are designed to carry switched IF and TV signals to many outlets from a single headend. Smart Switchline XS combines high quality in a compact size for easy installation in small spaces.

SMART SWITCHLINE XS4

KEY POINTS

The outputs are along one side to make installation neat and easy and wall fixings are provided. The cost effective configuration offers different levels of attenuation -17dB, -8dB and 0dB. They can be used with long cable drop lengths without compromising signal quality. The LNB supply can be fed, via the switches, from the receiver and the inputs on the front are colour coded for easy installation. Packaging 1pc

SMART SWITCHLINE XS5

KEY POINTS: The outputs are along one side to make installation neat and easy and wall fixings are provided. The cost effective configuration offers different levels of attenuation -16dB passive, active -8dB, active 0dB and terminal 0dB. They can be used with long cable drop lengths without compromising signal quality. TV Band 5-862MHz has a passive forward and return path. The inputs on the front are colour coded for easy installation. When combined with the MiniDiSEqC switches using a mounting tool kit it is possible to distribute 16 polarities + TV. Packaging 1pc

SWI3906A

SWI3908A

SMART SWITCHLINE XS9

KEY POINTS

The outputs are along one side to make installation easy and neat. Within the packaging there is a plastic support to fix the switch either vertically or horizontally on the wall. The cost effective configuration offers different levels of attenuation passive -16dB, active 0dB and terminal 0dB. They can be used with long cable drop lengths without compromising signal quality. TV Band 5-862MHz has a passive forward and return path. On each output there is a dip-switch for DiSEqC inversion. Packaging 1pc

Amplifiers Switchline

AMP9254

AMP9254A

AMP9294

HEADEND AMPLIFIERS FOR CASCADABLE SYSTEMS

Range of SAT amplifiers with TV input dedicated to the Smart Switch Line XS range.
The gain is adjustable on all of the SAT inputs. Versions available with 5 and 9 inputs.

PRODUCTS ADVANTAGES

The product uses a "Switch Mode" power supply that guarantees high reliability for the product; AMP9254 and AMP9294 have a fixed slope to ensure the correct signal level with long cable lengths. There is gain control on every input; on the AMP9254A there is slope adjustment on every output. The TV band 5÷862MHz is passive for the forward and return path.
Packaging 1pc

POWER SUPPLY WITH D.C. INSERTER

SPS1750

The D.C. power inserter. It provides a 15Vcc 500mA output voltage and is supplied with 220-230V ~ 50MHz. The D.C. inserter works from 40 to 2150MHz with a 1 dB insertion loss. With female F connectors. Insulation class: II. Operating temperature: -10°C 55°C. Packaging 1pc.

• FITTING taps
on switches with 5 or 9 inputs
using "Quick F" connectors

2 INPUT IF FILTER AMPLIFIER: product code AMP9724

TECHNICAL FEATURES

Bandwidth	950 - 2150MHz
Gain adjustment	5 - 20dB
Slope adjustment	0 -14dB
Max output level	
2 equal carriers (-35 dB IM3)	105dB μ V
Noise figure	>6dB
Filter selectivity at	
830 MHz	>50dB
Power supply	12 - 19Vdc
Current handling	450mA per input
Consumption	80mA per input
Isolation between inputs	30dB

- High output level
- 2 SAT inputs, 2 outputs
- High pass to 950MHz
- Gain from 5 - 20dB
- 14 dB slope adjustment
- Wall fixing hook

MECHANICAL FEATURES

Dimensions	121 x 56 x 42mm
Weight	200g

Switch SWI1201A

Transparent at: 14V/ 18V/ 14V + 22KHz/ 18V + 22KHz; Metal case; Connector: F; Impedance: 75Ohms; Conformity: CE; Compatible DiSEqC versions 1.02: SWI1201A Switch A / Switch B option

Item code	Use	Bandwidth (MHz)	Insertion loss	Consumption
SWI1201A	for IF switched installation for 8 - 16 polarities	Input 1: 5-2150 Input 2: 950-2150 Output: 5-2150	Terrestrial: 3dB Satellite: 4dB	30mA
