

Howto Power Supply alterations Kit

Dear customer, before starting with any modifications, please note that the ESD rules for handling electronic parts must be strictly observed. Use appropriate tools only. A temperature controlled soldering station is absolutely necessary. Destruction of your Dreambox caused by soldering results in a loss of any guarantee. We are therefore offering to handle this for you.

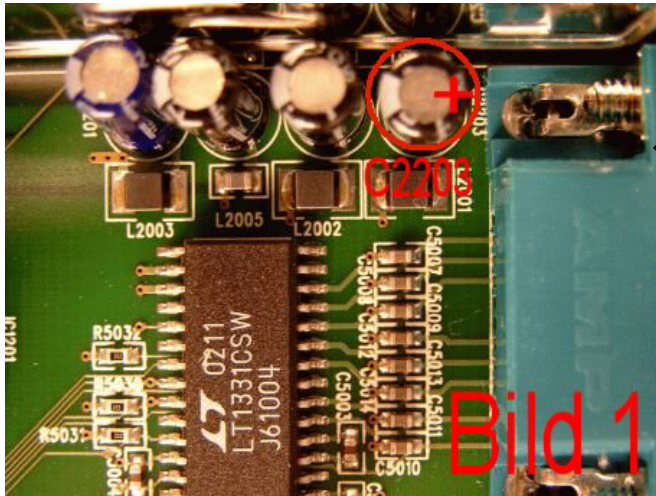

We sent you the below mentioned electrical parts:

1x **D6017** STSPS1545CT, 1x **C6022** 2200 μ F/10V, 1x **C2203** 220 μ F/16V, 2x **C6020** 1500 μ F/10V

This is a general view:

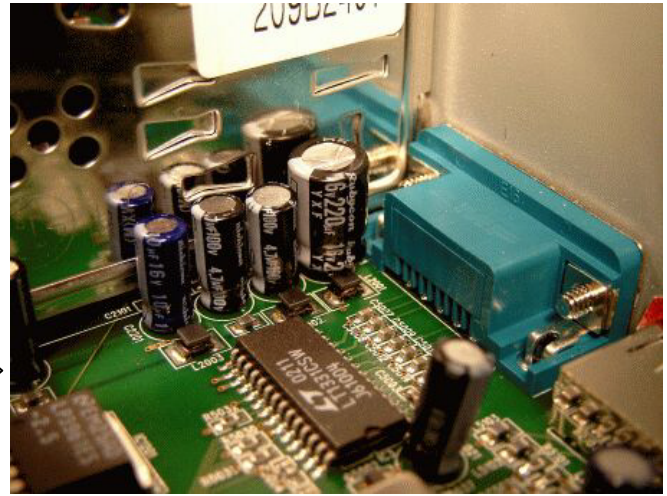

above you can see a demonstration of how to make the electrical parts fit (left photo shows both capacitors 1500 μ F, the right photo shows the diode)
