

Director's Cut SCART

Video Capture and Export for Mac or PC

Transferring your VHS tapes into high quality digital duplicates is now easy with Director's Cut SCART!

Simply connect Director's Cut to your VCR with the SCART cable and the FireWire cable to your computer and start capturing with your favorite video application like iMovie, Ulead VideoStudio, Pinnacle Studio and many more. Edit your movies with your favourite Video software and burn them to DVD or export them back to VHS.

Director's Cut SCART's built-in hardware DV (Digital Video) compressor guarantees a clear and sharp picture with great stereo sound. Designed with user-friendliness in mind, Director's Cut SCART does not need complicated software or hardware settings to work - Video finally made easy!

Key Features

Easy Connection of your VCR or Camcorder via SCART or S-Video

Featuring SCART and S-Video, Director's Cut SCART gives a choice of high quality connectivity. No need to mess around with converter cables or such!

Compatible with virtually any DV editing application

Recognised by your computer as a DV camcorder, Director's Cut SCART requires minimal setup.

Perfect quality real-time video conversion

The built-in video compressor/decompressor delivers a clear and sharp picture when capturing a exporting video. Video is captured and exported in full screen full frame rate.

Powered by FireWire!

Director's SCART does away with the need for an external power supply by using the FireWire bus.

Robust aluminium case

Built to the highest standards of quality by Miglia, the robust aluminium case ensures your video converter is well protected against shocks.

SCART, S-Video and FireWire Connectivity!

SCART is the established European standard for connecting home video equipment like TVs, VCRs, DVD player, etc... Director's Cut features a bi-directional SCART connector that let's you import or export video to your computer. The days of messing around with SCART-to-Composite cables are finally over!

If you own a camcorder, you can easily connect it to Director's Cut SCART using the built-in S-Video port.

Connection to your computer is via a FireWire, the universal standard for digital video equipment.

Director's Cut SCART brings true plug&play video to your computer!

PAL, SECAM and NTSC Support

Director's Cut SCART supports the two standards most commonly used in Europe: PAL and SECAM. Camcorders or VCRs purchased in the USA are also compatible with Director's Cut thanks to its full NTSC support and S-Video connectivity.

Use your favourite video application!

Director's Cut SCART is designed to be compatible with a very broad range of video editing packages. Tested with iMovie, Final Cut Express and Pro, Ulead VideoStudio, Pinnacle Studio, Premiere and many more, Director's Cut will integrate seamlessly into your video editing flow.
